

InstantTM Notify

Academic

A notification and contact system designed specifically to improve efficiency

Instant Notify-Academic allows a more efficient method to communicate because it eliminates the time and expense associated with phone-tree communications and the technology costs required to purchase and maintain traditional auto message systems.

Instant Notify is a perfect tool for peace of mind in any kind of emergency (fire, flood, evacuation, disaster, school closing, late start or early dismissal). Emergencies and unexpected changes to school events can't be avoided. Parents, students and faculty can now rely on **Instant Notify** to inform them of important information in a timely fashion. Faster, more reliable messages to a variety of devices and locations increase the likelihood that the message will get through.

Instant Notify is also a natural fit for sports teams, school clubs and more. Coaches can remind the players and parents about practice or tell them the big game has been rescheduled. It's great to contact the school staff and faculty for reminders and updates too! And when it comes to communication with parents regarding student truancy, homework or classroom projects, **Instant Notify** is ideal.

Creating callout list(s), recording messages and selecting options is incredibly easy so setup time is a snap. The system is located in **your** facility so all of the information remains completely confidential. List members can be parents, baby-sitters, students, faculty and more. Depending on the situation, **Instant Notify** can be told to *Notify All List Members, or just certain grades, or just faculty, you decide!*

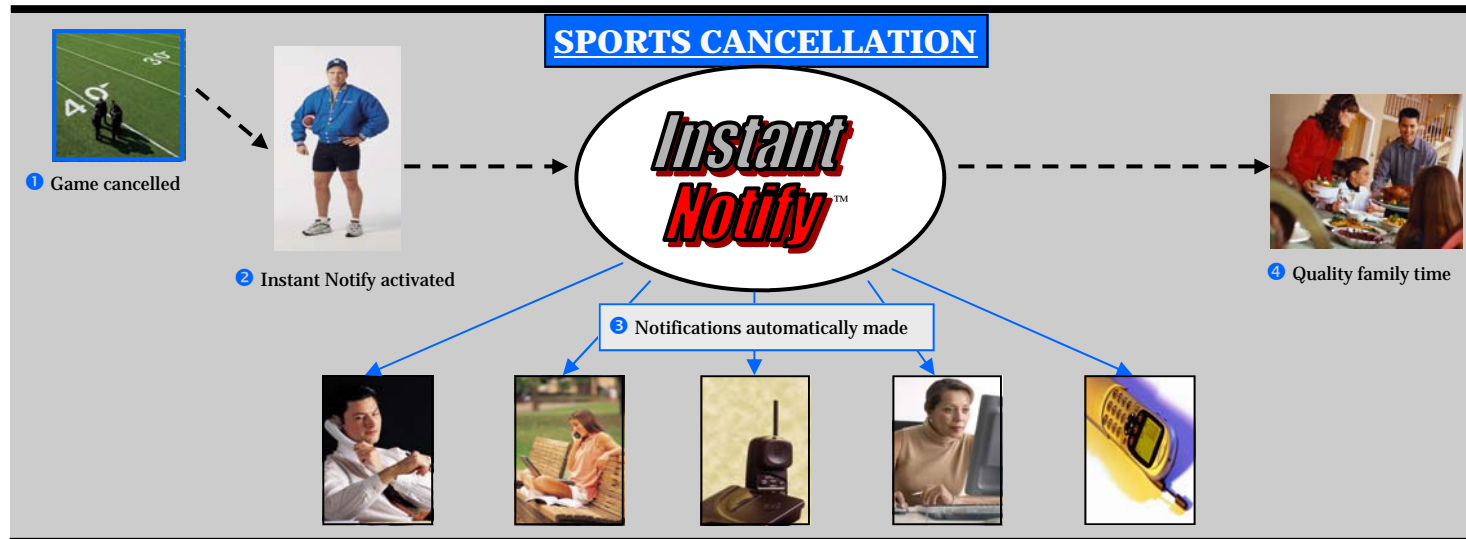

Instant Notify is a perfect tool to get your message through because it can be delivered to a standard phone, a cell phone or an answering machine or sent as an email or text message. Unlimited lists can be created with an unlimited amount of names per list.

Messages can be recorded real time and/or prepared beforehand to address almost any type of campaign. Messages can also be recorded remotely from any telephone and lists can be created locally or remotely. Isn't it time you enrolled **Instant Notify-Academic** in your school?

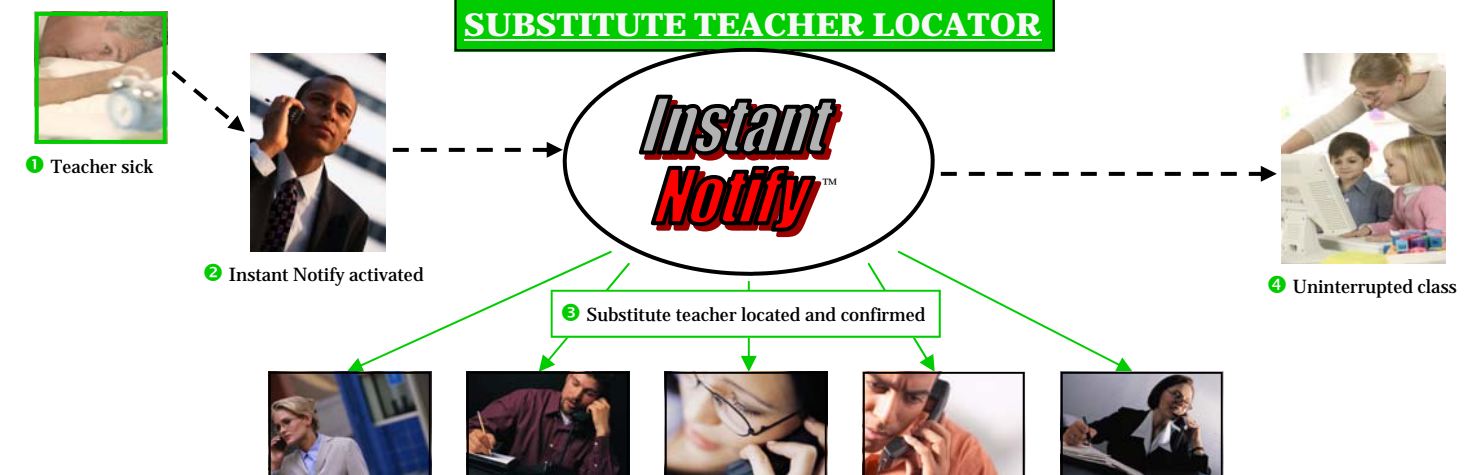

EMERGENCY

SPORTS CANCELLATION

SUBSTITUTE TEACHER LOCATOR

School productivity continues to increase when **Instant Notify** is used to automatically contact your substitute teacher list. The system calls each person until the amount of substitute teachers you need that day is confirmed. The next time you need teachers, **Instant Notify** starts calling where it left off so that everyone is afforded equal opportunities.
